EMPLOYMENT REVIEW

AUGUST 1987
VOL. 40 NO. 8

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Thomas F. Hartnett, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS
JEREMY P. SCHRAUF, DIRECTOR

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

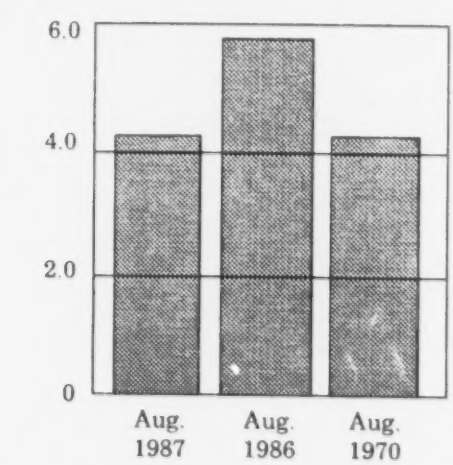
MONTH IN REVIEW
August 1987

Civilian Labor Force

New York's economic resurgence continued as employment advanced to another record high and the unemployment rate declined to 4.3 percent in August from 4.5 percent in July 1987. The rate, which has been below 5.0 percent in each of the last five months, was the lowest for August since 1970. (In August 1970, the rate was also 4.3 percent.) The state's unemployment rate was down 1.6 percentage points from August 1986.

Unemployment rate for August at lowest point since 1970



Resident employment in the state increased 12,000 over the month to a record 8,292,000 in August. Over the year, employment was up 262,000.

The number of unemployed persons was 376,000 in August, down 18,000 over the month and 125,000 over the year--its lowest level for August since 1970.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domesticworkers in private households) increased 15,500 from July 1987 to 8,122,300 in August, a new high for the month. The nonfarm upturn re flected the return of factory workers from unpaid furlough, robust construction activity, and a growing demand for business services.

Employment in construction, services, and finance, insurance and real estate was at all-time high levels. The job upturn in construction (+7,100) was stronger than August gains in recent years, partially due to the return of work of striking air conditioning installers and heightened building activity at Fort Drum. The expansion in services payrolls (+2,500) largely reflected gains in business services jobs. Hires in the brokerage and real estate industry led the rise of 2,000 additional jobs in finance, insurance and real estate employment.

Trade employment lost 100 jobs in August. Despite the setback, employment was at a new high for the month of August. Cutbacks by general merchandise stores accounted for the bulk of the losses while hiring by eating places led the job increases in the trade division.

The advance in manufacturing employment reflected the return of workers from vacation furloughs. Virtually all of the factory job pickup (+12,200) occurred in the nondurable goods segment, with the largest gains reported by the apparel industry. On the down side, the motor vehicle equipment industry showed the largest loss because of a temporary partial shutdown of an automobile assembly plant that was rotooling for model changeover.

Employment losses in government (-8,400) tempered the nonfarm job advance. The drop in public employment mirrored cutbacks of local school personnel. Employment in another major division, transportation and public utilities (+100), was essentially unchanged.

Since August 1986, the state has added 211,600 jobs to its nonfarm payrolls. All industry divisions, except manufacturing, had higher job levels than a year ago. The employment gain in trade accounted for 44 percent of the nonfarm upturn.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 60,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job with 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment

Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1986 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--**Earnings, Average Hourly.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Earnings, Average Weekly.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time eployment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-

keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic compostion of the areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. Coverage of the classification *services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.

3. **Annual Labor Area Report.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Fiscal year reports are available for the state, selected major labor areas and New York City.

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

5. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state and local government.

6. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes each settlement (changes in wages and fringe benefits) affecting 250 or more workers.

7. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

8. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 11, 12, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Brief.** Occupational briefs are available for: *Computer Programmer, Cosmetologist, General Duty (Registered) Nurse, Licensed Practical Nurse, Occupational Therapist and Assistant, and Physical Therapist and Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information.

10. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for new York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative actions plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 19.

11. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

12. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00

13. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks, American Indians, Eskimos, and Aleuts, Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

14. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

15. **The Jobseeker.** A 106-page guide designed primarily to assist young people entering the job market. Contains sections on the explanation of the job market/labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 133 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First five copies are free. Additional copies are available at 50 cents per copy.) February 1986.

16. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticable occupations. May 1987. Price $10.00.

B-PUBLICATIONS

231. The Garment Industry in New York State. A report on the economic conditions of the garment idustry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

235. A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983. A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus, Albany, New York 12240.

246. Directory of Labor Unions and Employee Organizations in New York State, 1985-86. This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $10.00.

LABOR RESEARCH REPORTS

81-1. Prevailing Wage Information for Unemployment Insurance Administration. Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

85-3. Calendar of Collective Bargaining, New York State, 1986. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in 1986. The report is organized by month of expiration or reopening and, within each month, by industry.

85-4. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1984.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are availabl

87-1. **Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1985.** An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

87-2. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1985.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1985.
